Find out about the most amazing product that the masonry industry has ever seen!

FLEXIBLE MASONRY ARCH FORMS

Imagine saving up to 80% of the time required to install a brick arch over a doorway or window.

The simple installation process starts with measuring and cutting your arch. (stock size:3'X10')

The arch is mounted to the wall using pre-drilled mounting tabs.

As you lay each row of bricks simply place the bricks onto the arch.

Even in progress the beauty of the speed arch is apparent.

The arch is designed to hold the weight necessary to complete the arch installation.

Once the brick has been laid there is nothing else to do. Your perfect archway is complete!
